

Light

under your
control.

Now, you can bring the light that enters your building under control with 3M™ Scotchtint™ and 3M Scotchshield™ Ultra Safety & Security window films.

Our line of films provides an elegant means for solving many of the most challenging aspects of managing the energy use of a building.

To help lower your energy costs, our films reject up to 79% of the solar heat that may otherwise come through a window.

By diminishing the heat, we increase the comfort of your people by helping to eliminate hot and cold spots in your building.

Our films help protect your furnishing, wallpaper and drapes from fading by blocking up to 99% of the sun's harmful ultraviolet rays.

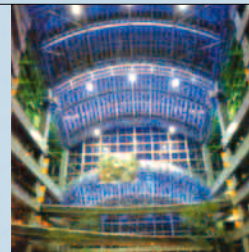

Keep the potential for forced entry and weather damage in check with 3M Scotchshield Ultra Safety and Security window films.

And with the wide variety of colors and densities we offer, our films can provide architectural unity to the exterior of your building.

By helping you control light, we can make it work for you.

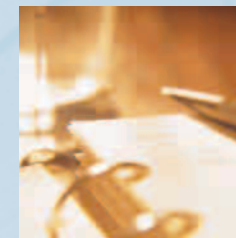

Working with
light for over
30 years.

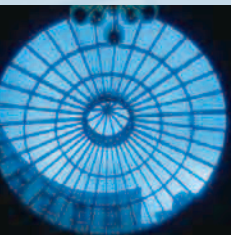

For over 30 years, 3M has been improving light with window films. As a leader in both adhesive and film technologies, 3M brings together these disciplines to create the finest products available for both consumer and commercial use. The quality of our window films is confirmed by an ISO 9002 certification and the satisfaction of hundreds of thousands of users worldwide.

In the morning, one side of your building is too hot and the other side is too cold. In the afternoon, it's just the opposite. With 3M Scotchtint window films, your whole building can be just right all day long.

By blocking out the sun's heat, your building's temperature is determined by your heating and ventilation system not the position of the sun.

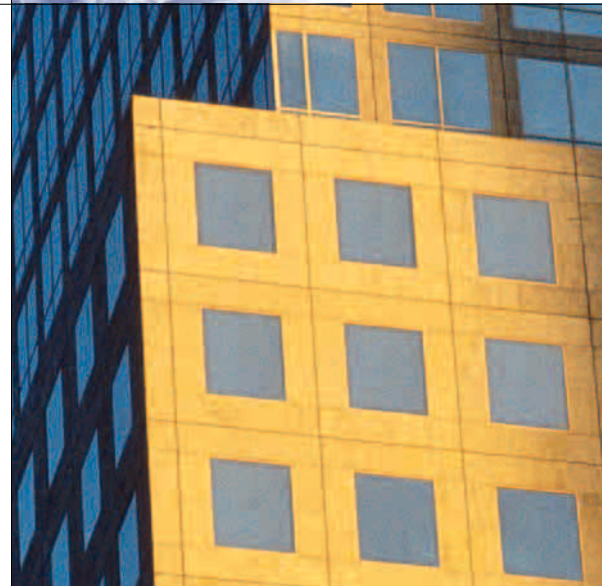

3M Scotchtint window film sends the sun's heat away from your building, saving you up to one ton of air conditioning for every 100 square feet of glass exposed to the sun.

For cold weather climates, 3M™ Scotchtint™ Plus All Season window film saves you energy by reflecting up to 30% of the indoor heat back into your building. In addition to making your building more efficient, it also makes your building more comfortable. So it reduces that drafty feeling employees may experience when they are near an exterior window.

Our films not only save energy, they help protect your furnishings, drapes, carpet, woodwork and artwork from the destructive ultraviolet rays that can cause fading and deterioration. Every film we offer blocks up to 98% of the sun's harmful ultraviolet rays.

They are also easy on the eyes. On the outside, they give your building a more pleasing, unified look. On the inside, our films greatly reduce the level of glare for your people.

Choosing 3M Scotchtint window films for your building is a decision with which you can be truly comfortable.

The windows can be the place your building is most vulnerable. Violent weather and crime often strike your windows first.

Fortunately, you can help manage both with the same film you use to control the effects of the sun. All our window films help hold your glass together when struck, helping to prevent flying glass and dangerous shards.

For areas that are particularly susceptible to extreme weather or vulnerable to crime, we offer 3M™ Scotchshield™ Ultra Safety & Security window films. These films have been tested for severe winds, bomb blasts and simulated break-ins. Security cameras have filmed failed break-ins during actual attempts.

In all cases, this film has been shown to significantly contain the sharp-edged shards that are the primary cause of injuries. For severe windstorms and other violent weather, 3M Scotchshield Ultra films also help to seal out the water, the primary cause of property damage.

The toughness that allows these films to withstand these extremes also stands up to day-to-day abuse. Our abrasion-resistant surface helps maintain the clarity of our films through repeated washings and general use.

When you choose 3M Scotchtint or Scotchshield window film, you can be secure in knowing your building is well protected.
