

A  
Breakthrough  
in Protection  
Against  
Graffiti &  
Vandalism

**VANDAL GARD**

# The Cost Effective Solution to Graffiti, Vandalism, Wear & Tear

VandalGARD is a tough, scratch-resistant, clear polymer film especially developed to protect a wide range of materials such as glass, plastics, metal and marble.

Professionally installed onto virtually any smooth surface, VandalGARD features a special mounting adhesive that facilitates easy removal and re-installation with a fresh replacement layer, quickly and efficiently.

## Cleans up Graffiti Fast!

The cost-effective solution to cleaning up graffiti, VandalGARD not only makes removal of spray paint and marker pen fast, but in most cases it eliminates the need to replace expensive advertising media normally damaged by graffiti attacks.

project developers make in expensive building materials used in locations such as airports, shopping centres, train stations, and building foyers.

Guarding against costly vandal damage to materials such as stainless steel lift doors, marble foyers and glass partitions, VandalGARD helps property owners and managers maintain the appearance of such areas at a fraction of the cost of replacing expensive building materials.

## A Barrier against Wear & Tear!

VandalGARD is also the material of choice for reducing the general wear and tear inflicted on a wide range of surfaces in high traffic areas such as schools, hospitals, banks, post offices and hotels.

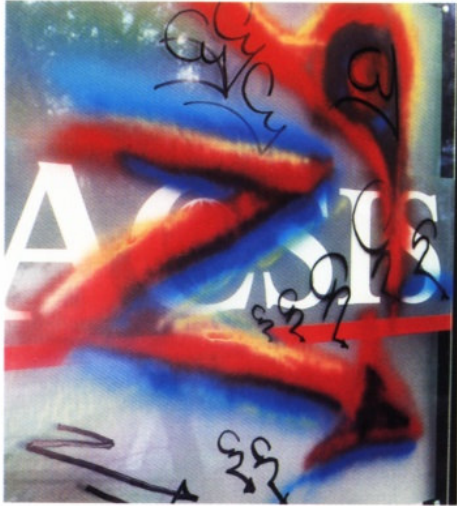

Glass entry doors, counters and hallways are vulnerable to scratching from items such as jewellery, keys, brief cases, trolleys and cartons - just to name a few. When wear and tear dictates removal, VandalGARD reveals a damage-free surface, ready for an invisible replacement layer.

Put VandalGARD to work protecting glass doors, elevators, transit shelters, information kiosks, outdoor advertising, bus and train windows. It's an invisible barrier between vandals and valuable property!

## Guards against Vandalism!

Because today virtually any public area can be subject to vandalism such as scratching, VandalGARD is designed to protect the investment architects and

## Ultra Violet Protection

Manufactured by one of the world's leading window film suppliers, VandalGARD is transparent yet features the added protection of built-in screening against the deteriorating effects of the sun's UV rays.

So not only does it protect surfaces from graffiti and physical damage, VandalGARD protects expensive advertising, signage and public information kiosks from premature fading due to UV radiation.

## Get VandalGARD on Duty!

VandalGARD is quickly and easily replaced, at a fraction of the cost of restoring expensive materials due to vandalism or accident damage. Acting as a tough, cost-effective, sacrificial barrier VandalGARD is the modern solution for property protection!

## Protection, Inside & Out!

Suitable for both interior and exterior use, VandalGARD is available in a range of thicknesses to provide maximum damage protection.

## Faster, Easier Transport Maintenance!

Used on public transport systems such as buses and trains, VandalGARD is a cost-effective maintenance solution because it simultaneously protects surfaces such as windows from vandal damage, while making graffiti removal easy for fast turn-around of maintenance and servicing.

## Strengthens Glass for Improved Safety!

VandalGARD adhesive systems mechanically bond the film to glass, so if breakage occurs it helps hold shattered glass pieces together to minimise damage to property and the risk of personal injury.

Specific grades of VandalGARD comply with International Standards for safety glazing and human impact.

**Exclusive Products & World Leading Technologies!**

**Quantum**

### *A Revolution in Glass Tinting Technology!*

Quantum revolutionises solar control window films by using 'sputter coated' exotic metals to totally eliminate the coloured dyes traditionally used by window films to cut down glare. And, unlike conventional metallised films, Quantum doesn't result in a mirror-like appearance that compromises night time views.

Quantum. The revolutionary advance in tinting technology because for the first time a window tint film has been

developed that offers significantly lower reflectivity with the unique benefit of a lifetime colour guarantee.

- Stops 97% ultra-violet light
- Cuts 70% of solar energy
- Eliminates 89% glare
- Guaranteed never to bubble or change colour

**Security**

### *Safety Films in a Class of Their Own!*

ArmorGard security safety film is specially designed for application to glass, and is relied upon around the world to protect lives and property. The result of years of research, development, and field testing under the most stringent conditions, ArmorGard Security film provides around-the-clock protection holding shattered glass together to prevent injuries if a window is damaged by hail, cyclone, explosion, flying debris or vandals.

Fitted to glass windows and doors, ArmorGard

Security film provides added protection from theft, because it normally requires several hard hammer blows to break the glass, and several more to produce an opening large enough to permit entry.

- Explosion resistant
- Fire resistant
- High impact human safety
- Performance under pressure
- Eliminates 99% ultra-violet light transmission
